

Power segment

**Integrated
solutions
for power.**

When caring about telecom infrastructure, broadband and data center energy sector, reliability is everything. That's why the Clemar offers the best integrated solutions that enable the implantation, expansion or complete reforms in the sector. With an expert and high technical team, Clemar is present at all project stages: surveys, licensing, special projects, execution, installation, management, training and maintenance.

Shelter to equipment:

Container for equipment with complete infrastructure, equipped with AC power, DC power, alarm, fire extinction system and air conditioning.

Available in the following versions:

- Structured Container
- Modular Mountable Container

Integrated Solutions:

- PTTA panels in MV and LV
- Motor-Generator systems and UPS
- Structured cabling
- Supervisory systems
- Optical fiber

Bring the best solutions for the energy sector. This is the energy that power us.

Complete infrastructure for critical environments:

- Executive design
- Civil engineering (and reform)
- Power AC, DC and emergency (Motor-Generator)
- Grounding System and Fire Alarm and Detection
- Substations
- Precision cooling systems
- Raised Floor

Special Projects:

- Gantries
- Yokes
- Trailers
- Metal structures
- Special foundations
