

Integrated Container

Integrated solutions to equipment

Integrated solutions to telecommunications equipment, data centers and sensitive equipment that require security and climate control. The dimensions are adjustable to the layout and structure fully integrated factory, generating speed in projects implementation. Available in two versions: structured and modular mountable, which, in special situations, can be assembled and integrated in the field.

MUL-T-LOCK Doors

Telemetry

Raised Floor

Enclosure for hot/cold aisle

Redundant Air conditioning and microprocess control

Internal TV System

Grounding System

Access Control

UPS System

Fire System

Optical fiber System

AC e DC Energy

Vantagens:

- Best cost / benefit
- Easy and fast assembly
- Secure against unauthorized access
- Easy maintenance equipment
- High versatility in use
- Weather resistant
- Structured or modular versions
- Installation in factory or field
- Reduce intervention of civil works
- Resistant to the required efforts
